READ THE FOLLOWING TEXT.

Life in the future

In my opinion, life in the future will be very different. Houses will be more efficient because they will have solar energy and all electrical appliances will use solar energy too. Fridges will talk to people and tell them when to buy food and how much they should buy. Fridges will make you your favorite ice cream in summer and favorite hot drink in winter.

Everyone will have robots at home. House robots will do lots of different things around the house: they will clean, they will go shopping when the fridge tells them to, they will help look after the children, and they will drive parents to their place of work.

Every person in a house will have a computer. Students won't go to school anymore, but they will stay at home with a virtual teacher. They will have lessons on their computer every day, including weekends. There will be no televisions, and everyone will watch TV on their computers. There will be no arguments in houses if people want to watch different TV programs at the same time.

I think people will have more free time. They will travel more but they won't travel by car. Everyone will use electric buses and trains with robots drivers. I think people will go on holiday to the moon in space rockets and if they are rich, they will travel to other planets, too. Space tourism will be the most popular type of holiday in the future.
